Boy Scout Camp Swimming Pool Officially Opened by Mayor

Will Prove Attractive Asset to District Boy Scouts for Their Annual Camps

The new swimming pool at the Boy Scout camp near Knowles ranch, two miles north of Coleman on McGillivray Creek, was formally opened on July 20 by Mayor G. Pattinson, who was invited to perform this ceremony by District Commissioner J. W. Gresham and Rev. A. S. Partington, district secretary. Mayor Pattinson expressed his pleasure at declaring the pool open, and hoped it would be beneficial to the Boy Scouts of the district, and that they would appreciate the efforts put forth in their behalf by the district executive.

District Commissioner Gresham replied to the mayor, thanking him for showing interest in the camp, and also those who attended the opening ceremony. Forest Ranger Boulton who has shown active interest in behalf of the camp, was present, accompanied by Mrs. Boulton, and a number of citizens were present. Following the addresses, the Scouts called for three cheers for the mayor, and the visitors from Coleman and Blairmore in turn gave the Scouts three cheers, following which the boys took a dive into the pool and it was considered well and truly opened.

The work has been mainly done by A. E. Knowles, with some assistance from the Scouts. An intake from the creek supplies the water, and the pool is situated among shaded trees. A stop gate shuts off the water when the pool is filled, and a seepage pool allows the overflow to filter through before it re-enters the main channel of the creek.

Murphy Here Again

Open air meetings were addressed in Blairmore and Coleman by Harvey Murphy, organizer of the Workers Unity League. He denounced capitalism, the C. C. F. government camps and the member for Macleod Federal constituency, G. G. Coote. Several local people came under the general attack of the speaker, and the trend of his address was that Communism is the only remedy for the world's ills. Murphy is out on bail pending an appeal against a year's jail sentence for participating in unemployed riots in Calgary early this year.

Coleman played Corbin a league football game on July 23 at Corbin, the score being 6 to 1 in favor of Corbin. A number of supporters went from Coleman and other Pass towns.

TOWN OF COLEMAN

IMPORTANT NOTICE Re TAXES

Notice is hereby given that a rebate of 7 per cent on current year's taxes only (1933) will be allowed on all payments up to and including August 15, 1933, at 4 p.m.

JAMES FORD, Secretary-Treasurer, Town of Coleman.

Sky Line Hiking in the Rockies

Organized trail hiking in the Canadian Rockies will be inaugurated for the coming year by a hike slated to start at Lake Louise on August 4th. An increasing interest is being taken in trail hiking in the Canadian Rockies, and a committee consisting chiefly of experienced members of the Trail Riders of the Canadian Rockies and the Alpine Club of Canada, has undertaken the organization of a new order called the Sky Line Trail Hikers.

The inaugural hike will start this summer on August 4th from Lake Louise and tramp over the Saddleback through Paradise Valley and over Sentinel Pass to Moraine Lake, where the first night's camp will be made. On Saturday, August 5th, the party will hike from Moraine Lake over Wenkenema and Onabla Passes and will have the thrill of crossing two glaciers before arriving

at Lake O'Hara. On Sunday the hikers will be able to take in the magnificent scenery around Lake Macarthur, Lake Oesa, and Mount Oadary, and members of the party will be able to enjoy the excellent fishing in Lake O'Hara. The Pow-Wow will be held on Monday, August 6th, after which the members will hike to Wapta and catch the evening train back to Lake Louise.

LOCAL AND GENERAL

The homing society had a race of young birds from Cowley during the week.

Mrs. Esquire, sister of Mrs. F. Creagan, and sister Jewel, are visiting here for several days.

Coleman entrants in the tennis tournament at Lethbridge are Mrs. S. C. Short, R. Shone, George Jenkins and C. Roughed.

Jack Williamson's parents paid him a visit this week, and on Wednesday with some friends enjoyed a picnic at Crow's Nest Lake.

Mr. and Mrs. A. J. Barbour of Bellevue recently returned from a motor trip of several weeks duration to Pacific coast cities.

The old Ford fire truck is being dismantled and in its place the Buick car purchased by the town will be used to convey the equipment.

Mr. and Mrs. Edgar Reid returned on Saturday from Vancouver, and were accompanied on their return by Miss K. Milley and Ian Neave, formerly of the Bank of Commerce staff in Coleman.

People having used magazines are requested to save them for the men at the airport camp west of town. Tie them in a bundle, address to Foreman of Camp, and leave at The Journal office. Same will be sent out, as reading matter is appreciated in the evenings and at week ends.

Bert Westworth had a surprise bath on Sunday while fishing at the south fork, which necessitated hanging his clothes on a tree while he sat down patiently waiting for them to dry. Bert says he fancied he was in the garden of Eden as he sat there minus clothes, and not even a fig leaf.

A rumor that a dead sheep was discovered at the intake of the water system in Crow's Nest river proved to be groundless. The dirty condition of the water on Tuesday afternoon was caused by the water at the dam making a new channel which stirred up a quantity of sand and mud.

Local News

Mr. and Mrs. J. A. McDonald and family spent Sunday at McBain's lake.

Mrs. J. A. McLeod and family, and Mrs. J. Devine and daughters, returned on Sunday from a pleasant holiday at McBain's lake.

Coleman visitors at McBain's lake on Sunday included Jack Williams, Robert Pattinson, Sonny Richards and Vic Lily.

Mrs. G. Kellock and son Jim left on Sunday night for Vancouver and Victoria, to spend three or four weeks holidays.

Rev. A. S. Partington has erected a stone wall to enclose his garden, which has quite a unique appearance, and improves the surroundings of the rectory.

A. D. McLean of Ottawa, inspector of Canadian Airways, made a brief visit to the airport camp on Saturday, and spent a few hours with his brother, Dr. McLean in town. He is desirous of seeing work progress on Project 58 so that landing facilities will be provided for airplanes.

No business is built in a day, but once a reputation is established for fair dealing and courtesy, it will stand against the attempted inroads of unfair competition and cut prices. People realize that every time sweatshop methods are encouraged, workers have to suffer in low wages and long hours.

At the home of Mrs. A. Dewart a delightful reception was held in honor of Mrs. R. Donaldson (nee Evelyn Stout) from 3 to 6 p.m. on July 20. About fifty guests were present and a very dainty lunch was served. The decorations included a three tier cake surrounded by pansies in the centre of the table, and varied garden blooms added to the general effect.

Coleman Footballers Retrieve Their Defeat at Corbin

Outplay Hillcrest in League Game by Score of 5-0—Visitors Not One Lucky Break

Coleman footballers retrieved their reputation from a 6-1 defeat at Corbin on July 23 by defeating Hillcrest 5-0 on Tuesday evening in a league game here. Play started with Hillcrest leading the attack, but superior combination of Coleman's forward line, combined with good defence of Stuart and Jimmy Anderson, prevented the visitors from scoring. Even luck was against them, for on a penalty kick in front of Coleman's goal in the second half, with the opportunity wide open and only the goalie to beat, the shot hit the goal post and McDonald saved it from bouncing in.

Jimmy Park scored twice for Coleman, Jimmy Joyce twice, and Willie Anderson once. J. F. Dugdale of Bellevue refereed the game. Hillcrest's defence left their goal down, as he made some good saves.

Mena Hercof

Following are the names of those who took part in the play staged by the Slovak Society in the Polish hall on June 30:

Alois Kratky, S. Dlabik, K. Gjeddos, F. Baruta, F. Panek, S. Kubinec, L. Bubniak, M. Veparina, T. Siska, K. Majercak, J. Majercak, S. Dzurek, J. Baruta, A. Zukka, J. Vavrecan, A. Kalivoda, J. Adamc, M. Carkos, T. Bruma, L. Sirak, K. Jandura, S. Janak, Mr. Kutis, M. Panik, T. Pklnia, F. Galvon, S. Siska, Mrs. A. Hatalcik, Mrs. M. Kratky, Miss M. Kapalka, Mrs. M. Gjedjos.

A report of this play appeared in July 6 issue of The Journal.

Life Means Change.

Occasionally the writer of this column feels the urge to pass on to the readers of it some thought, or idea, or even complete article he has come across in his own reading. In surrendering to that urge this week, we pass on an article appearing in a little United States magazine which does not go into general circulation, which has no subscription list, but which is distributed free to a selected list of people in all parts of the world. That article follows:

To prepare us for life in a world that is continually changing, that is a very small part of a universe in which nothing is or ever will be static even for the space of one brief second, humanity has been taught, from the earliest dawn of reason, to strive for permanence, security, safety, ease, something which we may accept as settled. Thus we find ourselves mentally and spiritually unprepared to meet the apparently sudden, unexpected changes which follow inevitably upon some wide-spread emergency. Instead of schooling ourselves to meet emergencies in their varied and unpredictable phases, we have preferred to be lulled or to lull ourselves into a sense of false security, to surround ourselves with an atmosphere of spiritual anesthesia. Instead of taking life as a tremendous adventure—and it is this or nothing—we delude ourselves into the belief that we have made of it something restfully secure, that we have created, in some measure at least, a lasting order of things. And we commit the added absurdity of telling our children that these things are so, when our whole experience, the experience of all humanity proclaims them to be utterly false.

How different would have been our reactions to the experiences of the last three uncommonly trying years had we been free from the traditional fear of change. And why should we fear change when it is the most certain thing that life brings us? It is the very essence of life; the vital germ of growth; the stimulus toward achievement; the point of far-flung outlook along the road of progress. Change gives life its vitality; lends it sparkle and variety and the lure of glorious adventure; makes it a sense of false security, to surround ourselves with an atmosphere of spiritual anesthesia. Instead of taking life as a tremendous adventure—and it is this or nothing—we delude ourselves into the belief that we have made of it something restfully secure, that we have created, in some measure at least, a lasting order of things. And we commit the added absurdity of telling our children that these things are so, when our whole experience, the experience of all humanity proclaims them to be utterly false.

The chief thing in living is life itself. The chief purpose in life should be to live it abundantly, joyously, zestfully; to savor each of its constantly varying phases; to get all we can out of it and to put all we can into it. We should not fear to meet any part of it. We should prepare ourselves for the realities of life, frankly admit them as realities, and reap the richest possible advantages from them. And if we do this we shall come to the inescapable conclusion that the genuinely desirable advantages of life have little if anything to do with material things.

If we would enjoy life to the full, we must change our traditional attitude toward it. Instead of building upon the illusion of permanence, we must build upon the certainty of change—constant change both within ourselves and in all other created things; physical, mental and spiritual change. For without change life could not exist. To imagine any possible permanency in life, anything static, anything unchanging even for the smallest period of our conception of time, would be to imagine our most fearful and hopeless conception of death. And life knows no death, only change, and continuing life.

There is no thought in anything I have said here that we should not strive intelligently and courageously for some measure of stability, some temporary standard of thought and action, in our material affairs; but that in our thinking, our planning and our striving we never should for a moment lose sight of the realities of life, and that neither permanency nor absolute security is one of them. Our ideas of security, of any settled order of things, should be relative. They should be held loosely and subject to the certainty of change. In other words, we should prepare ourselves for change as for the one sure thing which life offers us. Our accumulations of things material should be secondary to our accumulations of things spiritual. The insecurity of material accumulations—our experiences, our memories, our generous and friendly impulses, our unselfish and tolerant motives, our whole attitude toward our fellows, our confidence in the eternal beneficence of life, our love of what is good, our desire for continuing human betterment, in short, all that our experience has taught us is most to be desired. Let us then accept life frankly as a glorious adventure, and face it at all times cheerfully and bravely. Let us banish fear, fear of present change, fear to venture because of uncertainty, above all else, fear of insecurity, let us be constantly prepared for change, ready to take advantage of it rather than to have it take advantage of us. Let us live our lives to the full and go forward cheerfully, bravely, confidently, and with light and hopeful hearts.

Some Birthday Dinner

Peter the Great, three tons of hippopotamus is 30 years old and Bronx zoo officials prepared his four-course birthday dinner. The appetizer was a bushel basket of mangos. In lieu of soup was served a sheaf of young corn stalks. Entree consisted of two loaves of brown rain bread. And the piece de resistance was Peter's standard dinner, 100 pounds of hay.

Drouth is threatening crops in parts of Honduras.

Prince Aids Unemployed

The Prince of Wales, as the landlord of the Duchy of Lancaster estate in the Gower Valley of Glamorgan, Wales, has let the local unemployed men at the nominal rate of \$150 to enable them to obtain coal for their own households. Each workman will work four hours a week in the colliery.

A fence twenty miles long without a bend or turn has been completed in Kingsville, Tex., on the boundaries of a ranch.

Summer Complaint Plays Havoc With the Bowels

Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it seizes you how it is going to let you run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief. Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

Botanists Are Interested

Awaiting News Regarding Discovery Of Musk Plants In B.C.

Botanists everywhere are awaiting eagerly news concerning the musk plants with the long lost odor on Tassada Island, B.C.

In connection with the reported discovery by Stanley Boys on Tassada Island, on the British Columbia Coast, of a musk plant carrying the distinctive odor common over twenty years ago but since unknown, Dr. Arthur W. Hill, director of the Royal Botanic Gardens, Kew, England, is keenly interested.

Dr. Hill has written to Frank Kermod, of the Provincial Museum of natural history, Victoria, saying the discovery, if it can be substantiated, is of every great scientific interest. He asks that if possible seed or plants with a strong musk scent may be forwarded to him at Kew, and gives instructions for their safe packing for the journey and outlines special precautions to be taken in forwarding them.

The musk of the odor well remembered by most persons of English upbringing—it was common as a pot plant for houses in England a quarter of a century ago—is said to have been taken to England originally from British Columbia by the famous Douglas whose name is perpetuated in our Douglas fir.

It is given as having originated on the American continent by authorities. It had commercial value for perfume manufacture years ago and there are commercial possibilities about its rediscovery in British Columbia apart from world-wide scientific interest.

Home For Orphan Boy

Adopted By Wealthy Couple Whose Dead Son He Resembles

The home of a wealthy silk dyer and such advantages as a college education were ready for a 13-year-old orphan boy from Omaha, Neb., in what seemed like a modern version of the old story of Cinderella and the prince.

The boy was Peter Christopolis, and immediate of Father Flanagan's Boys' Home near Omaha. A picture of the lad, an orphan since early childhood, was the medium through which he has become just like a son in the home of Mr. and Mrs. Jean Strongs, who live at Paterson, New Jersey.

It seems that Strongs was the picture of Peter and was struck by the resemblance of his son, Henry, who was drowned in Green Pond, N.J., a little over a year ago. As a result, arrangements were made to bring Peter in the Strongs household to take the place of the dead boy.

Farming On Small Scale

Has Proved Best During These Times Of Depression

Large-scale farming is a worth-noting, is no longer being advanced as a cure-all for agricultural ills. It is not so many months since farmers were being told that agricultural salvation could only be attained by mass production on very large farms, and fears were being expressed that small farmers would lose their individuality and become something approaching serfs. But the depression has changed all that, as it has changed many other things. The small farmer is managing to get along in some way or other, but the large-scale farmers have gone broke or shut up shop.—Brookville Recorder and Times.

Prairie Wheat Sales Higher

Show Substantial Increase Over Corresponding Period In 1932

Prairie wheat marketings showed an increase of 2,651,573 bushels over the corresponding period last year for the week ending June 23, according to Dominion Government figures released this week.

Total marketings for the crop year to date were 356,742,219 bushels as compared with 259,022,190 a year ago. For Saskatchewan the year's sales were 180,485,507 as compared with 115,863,839.

Still Very Much Alive

Sir Murchison Fletcher, High Commissioner for the Western Pacific, who has been visiting London, went to Tassada Island last September to pre-empt the Queen with the D.B.E., conferred upon her by King George. He was met on the beach by the tortoise which Captain Cook gave to the Queen's great-grandfather in 1773. Sir Murchison stated that the tortoise is very much alive and that he fed it with bananas.

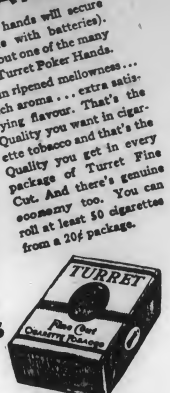

Germany has a "renovize" campaign.

Powerful Flashlight FREE for POKER HANDS!

ONLY Four complete sets of poker hands will secure you this handy flashlight (complete with batteries). Useful in the car or in the house and but one of the many valuable gifts given in exchange for Turret Poker Hands.

Sun ripened mellowness... rich aroma... extra satisfying flavour. That's the Quality you want in cigarettes. Quality you get in every pack of Turret Fine Cut. And there's genuine economy too. You can roll at least 50 cigarettes from a 20¢ package.

More Aeroplane Passengers

Business Increasing On U.S. Lines and Competition Is Keen

The skyways of North America are being "double tracked."

A survey of major air lines carrying passengers to every corner of America—and one of them planning to extend across the ocean—shows that commercial aviation has increased its passenger income by one-third in recent weeks.

The reason: Renewed activity in general business and loss of what aviation men call "air anxiety" by the public.

The result: A battle for the new business comparable to that of the railroads several decades ago.

In the scramble for passengers, millions of dollars have been poured into new equipment. Soundproof cabins have been evolved by United States Airlines. American Airways has responded with ships in which passengers can sleep on comfortable berths during night trips between Chicago and the Pacific Coast.

A smaller line, Northwest Airways, has ordered a fleet of "planes capable of 215 miles an hour with a cruising speed of 180 and announced a plan to compete for business between Chicago and the Pacific northwest.

At the coast, Northwest will connect with Pan American Airways, which plan to extend its present lines to Alaska across the Arctic to Asia. At present, Northwest operates between Chicago and Montana and northward to Winnipeg, Man.

As proof of increasing business the Chicago municipal airport announced that 9,927 passengers were carried out of Chicago on regularly scheduled trips during 1934, an increase of 100 per cent. from a year ago.

Many licensed pilots have obtained employment in the past few months, air line officials announced, because of additional "planes placed on schedules."

Trips between Chicago and New York have been doubled by three lines. A traveller between the two cities now has a choice of more than 20 "planes daily, the time of the schedule ranging upward from four and three-quarter hours eastbound to five and one half hours westbound.

Recovery Program

Plans Formulated In United States To Assist Workmen

With almost 1,000,000 mill workers tackling their jobs under the stimulus of higher pay, plans were fashioned by the United States industrial administration for summoning the whole force of public opinion behind the Rooseveltian endeavor to open more jobs and fill additional salary envelopes.

Hugh S. Johnson, industrial administrator, called in his staff of advisors to check over every detail of the preparations for a campaign modelled after the Liberty Loan drives of the Great War days to unite the citizenry behind the recovery efforts. Secrecy surrounded the formulation of the plans.

A national campaign now in the making would seek even more formal, purely voluntary wage-raising and hour-cutting action, along the lines of that taken by the steel industry in increasing wages 15 per cent. today, without waiting for an executive order by the president.

A strong appeal would be made that himself might form the centre of the movement. It still was considered possible that he might, in this, recommend general hour limits, and advise what minimum wage levels should be.

Located Lost Galleons

Pirate Loot Within Grasp Of An English Adventurer

Treasure buried long ago by pirates who had stolen it in raids on merchantmen is believed to be within the grasp of an expedition led by Stratford D. Jolly, an English adventurer, who, with his party, set out from a British man-of-war in a converted steam tug.

Jolly believes the treasure is within reach. He has returned to England for a short time, but will continue the search in another vessel the trawler having been sold.

One of his party, Frank Cooper, who gave up a post in the glove-making industry at Yeovil to join the expedition as gold diver, was able to locate at Trinidad a number of sunken Spanish galleons, which were scuttled in 1797 to avoid capture by the British Fleet, according to Jolly's story.

Finding the galleons, he said, was as easy as could be for Cooper, who used for the purpose only a gramophone spring. "That Cooper's work was successful we know," said Mr. Jolly, "because we took soundings of the sunken ships. They are down in only seven fathoms of water—a depth easy for divers to work in—and, above all, they are in a very sheltered part."

Wanted To Look Around

Prince George Climbed 180-Foot Scaffold Beside "Big Ben"

Prince George demonstrated remarkable nerve before a small crowd of people when he climbed up the web-like scaffolding surrounding Big Ben's tower at the House of Commons. No one looking on knew who the "human fly" was. To them it was simply a young man in a gray suit.

The prince, who expressed a desire to climb up the ladders from platform to platform until he reached Big Ben, and then have "a good look around." Accompanied by two of the men engaged on the scaffolding work, he reached the highest point. After a few minutes he climbed over a parapet leading to the gallery where the bells that chime the quarters are installed. The prince ascended by means of a long spiral staircase inside the tower.

"Climbing the ladders to such a height is not an easy job for one not accustomed to the work," an official told a reporter. "But the prince got up very quickly, and showed fine nerve. He told us that he thoroughly enjoyed the experience." During the 180 feet ascent the prince had to climb up steep ladders from which, while glancing down, he could see nothing between himself and the ground. In many places the scaffolding upon which he had to walk consisted only of a couple of planks.

Russia's New Fast Train

With a new idea for locomotives, S. S. Valdeen, an official scientist of the Russian transport commissariat, has invented an exceedingly fast railway engine which is called an "aero-train." The prefix "aero" is a trifle misleading, because the locomotive does not fly, but the term is intended to describe the engine as a type of aeroplane type, with propellers. It is stated that the train is stable at a speed of more than 150 miles an hour.

Savers in Japan are transferring their money from postal banks to commercial institutions which now offer a higher interest rate.

Ceylon's First Woman Lawyer

Eighteen Year Old Girl Was Brilliant Scholar In London

Among those to pass the examination for call to the English Bar is Miss Avarida Mehta, of Colombo, Ceylon.

Miss Mehta is only 19 years old, a slim Parsee girl from Ceylon, whose appearance would give the impression that her school days were hardly over yet. She was a brilliant scholar at the Maria Grey Training College, London, England, and after she matriculated she read for the Bar in Lincoln's Inn.

I saw her at her home in Hampstead, where she is living with her mother—writes an Evening News representative. She was wearing a native dress of blue and gold.

"I shall be the first woman barrister in Ceylon," she said. "There are, of course, a number of women lawyers in India, but up to now there have been none in my own country."

"I am eager to begin work at the Bar in Ceylon, but I have to wait some time yet before I can do that. I cannot be called until I am 21, and I have to eat my dinner for three more terms. I may go to India first and practice there, or a time before going to Colombo."

Miss Mehta said there was no branch of the law in which she took especial interest and her practice would be a general one. Her father is a market superintendent at Colombo, and one of the few Parsees in Ceylon. "There are only 200 there," she said, "but there are 100,000 in India."

Matter Being Considered

Train Ferry May Be Inaugurated Between England and Sweden

A ferry train between Sweden and Britain may be inaugurated, if present plans materialize. A minimum capital of one-half million kronor already has been subscribed, due to the confidence with which the project is regarded in Britain.

Drawings for the ferry have been made and the boat is estimated to cost 3,500,000 kronor and have room for 54 refrigerator cars, 10 freight cars and 430 first-class passengers. The Swedish terminal will be Varberg.

It has been suggested that during the summer months the ferry make an intermediate stop at Copenhagen.

Hardly Necessary

With the nations feeling the way they do about each other, what need is there for trains that go 110 miles an hour and airplanes that go 250 miles an hour? It must be that we are perfecting communications in order to get away from each other as fast as we can.

The production of potatoes in Canada in 1932 amounted to 39,416,000 cwt., the smallest yield recorded since 1916.

Mollisons Crash On Landing At Bridgeport Airport

Bridgeport, Conn.—After conquering the north Atlantic and flying within 60 miles of their goal, the British air crew, Amy and Jim Mollison, crashed their black cabin biplane at the airport near here Sunday night but escaped with slight injuries.

The couple, who had set out from Pendine, Wales, Saturday in an effort to fly non-stop to New York, circled the airport five times in an apparent effort to find a safe landing place. The airport is located in the village of Stratford, near here.

Captain Mollison told a doctor at the Bridgeport hospital that he had run short of fuel while coming down the coast.

He said he saw the lights of the Bridgeport airport and decided to land there. He said he circled the field five times before he put the plane down.

The airport was lighted on the chance they might land there, and Fred Moller, airport manager, was atop the administration building when their ship appeared.

On each of the five circuits of the field the aviators attempted to come down on the regular runways of the aerodrome without success. Moller was signalling frantically all the while.

On their sixth attempt to land they came down in a drainage ditch some distance from the field. Their biplane nosed over in soft marshland and both of the flyers were thrown clear of the machine.

Working with pocket lamps, searchers discovered them about 400 feet from the boundary of the airfield. "For God's sakes come over here," shouted Jim Mollison from out of the darkness.

The searchers quickly found him, suffering from cuts and gashes.

His wife was lying about 15 feet away. The searchers reached into the smashed fuselage and cut away enough fabric to fashion stretchers for both of the flyers. Using these, they rushed the Britons to conveyances, then to the Bridgeport hospital.

"I was so tired I didn't know where I was headed," Mollison told hospital attendants. "He couldn't see. He couldn't see," moaned his wife.

A huge welcome had been awaiting them at Floyd Bennett Field, which Saturday night was the scene of Wiley Post's arrival at the conclusion of his world flight. General Italo Balbo had paid a visit to the airport during the afternoon to receive word of the progress of the couple.

The airport had on the shores of Long Island Sound, was the last of any size before their goal. The Mollisons were literally in sight of New York when the crash occurred, for on a clear night the lights of the city's skyscrapers can be seen from the air here.

City after city from Nova Scotia to Connecticut had sighted the plane, called the "Seafarer," on the southerly flight during the afternoon and early evening. It passed over Advocate Harbor, N.S., at 2:05 p.m., E.S.T., and was first seen in the United States at Fort Harbor, Maine.

The trans-Atlantic journey was the first leg of a 12,000-mile triangular flight planned by the couple. After arriving in New York they had planned to rest for a short time and then back-track their ocean trail and continue across Europe to Baghdad. Thence they intended to go back to London.

The start of the journey for the 28-year-old Captain Mollison and his wife, who is four years younger, had been long delayed. They had damaged their plane in an attempted take-off at Croydon airport, near London, on June 8. After repairs were made they were forced to wait for weeks for favorable weather.

Mrs. Mollison, wearing white overalls and carrying a lipstick as her only baggage, termed the forthcoming journey "the greatest adventure of my life."

Manitoba Crops

Drouth and Hoppers Reduce Yield in Many Sections

Winnipeg, Man.—Varied crop prospects in Manitoba, ranging from excellent in the area north of Riding Mountain to poor in the extreme southwestern corner, are reported in the summary issued by the Manitoba department of agriculture.

Absence of adequate rain and grasshopper damage continue as outstanding factors. Rain has been insufficient for seven weeks. A considerable section of the Red River Valley and a strip across southern Manitoba near the Dakota boundary are now infested with full-grown, flying hoppers, says the report.

Rather than chance loss through drouth and hoppers, some farmers are cutting their crop for green feed.

Visiting Western Provinces

Trip of Dominion Liberal Leader to Last Five Weeks

Ottawa, Ont.—On the first stage of a western trip which will occupy five weeks and probably take him to all three prairie provinces, Rt. Hon. Mackenzie King, Dominion Liberal Leader left Ottawa July 19.

The Liberal leader may visit the World Grain Exhibition at Regina. He will go by his own constituency of Prince Albert for a couple of weeks.

Mr. King may also visit the constituency of Mackenzie, Sask., where a by-election to fill the seat vacated by the appointment of Mr. N. Campbell to the tariff board is to take place.

British Empire Conference

Advances Proposal For Empire To Discuss Its Own Affairs

Melbourne, Australia.—Australia joined in the expressions heard elsewhere, official and unofficial to the effect the empire should hold its own conference if the World Economic Conference proves a failure.

Addressing a gathering of ex-servicemen here Hon. H. G. Latham, Attorney-General in the Commonwealth Government, declared: "If the World Economic Conference fails I earnestly hope an attempt will be made to hold a British Empire conference at which empire affairs may be placed upon a co-ordinated and co-operative basis."

Prominent Rotarian Dies

Vancouver, B.C.—James W. Davison, former Calgary business man and prominent Rotarian, died here following a lengthy illness. He was 61 years of age. Mr. Davison was a former president of the Crown Lumber Company in Calgary. He had spent two years travelling in India, the Orient, Australia and New Zealand organizing Rotary clubs.

To Head Party

Woodworth Elected Chairman Of C.C.F. Organization

Regina, Sask.—James S. Woodworth, veteran Labor chief and provisional president since the federation's formation in Calgary a year ago, Friday night was unanimously elected first national chairman of the Co-Operative Commonwealth Federation.

The tall bearded Labor member of parliament, from Winnipeg North Centre was given a rousing reception when he was declared elected after Robert Gardiner, M.P. for Acadia, and E. J. Garland, M.P. for Bow River, declined nomination.

Six provinces named three representatives each to form the national council. Those elected were:

British Columbia—Angus McInnis, M.P.; Vancouver; George Williams, M.P.; Kamloops; and W. A. Pritchard, Vancouver.

Alberta—William Irvine, M.P., Wetaskiwin; Robert Gardiner, M.P., Acadia; and Elmer Roger, Edmonton.

Saskatchewan—George Williams, Semans; M. J. Coldwell, Regina; and Mrs. Sophia Dixon, Unity.

Manitoba—Miss Beatrice Bridgen, Brandon; John Queen, M.L.A., Winnipeg; and S. J. Farmer, M.L.A., Winnipeg.

Ontario—Miss Agnes Macphail, M.P., South East Grey; Captain Elmore Philpott, Toronto; and Thomas Cruden, Toronto.

Quebec—J. L. Whitty, Alderman Joseph Shubert and Lloyd Hammond, all of Montreal.

The 18 selected will form the council for the next year, although representation from the Maritimes may be added when provincial councils there are formed.

Accepting the election, Mr. Woodworth complimented the delegates on the spirit of good will that had prevailed during the convention "and I think we can look forward to a progressive year," he declared.

Russia Would Purchase United States Products

Trade Depends Largely On Adequate Facilities For Credit

Washington.—Russia is negotiating for purchase of \$100,000,000 of American farm and mine products, and, if adequate credit facilities can be obtained, is contemplating the purchase of up to \$1,000,000,000 worth of goods in the country.

Persons familiar with the negotiations said Russia wants large quantities of cotton, sugar and nonferrous metals, and would resume her former large purchases of farm and industrial machinery if conditions were suitable. Talks between Russian trade representatives and officials of the United States regarding the sales have taken place but are still in the most general sort of stage.

General Balbo Visits President

Washington.—General Italo Balbo, leader of the Italian armada that flew across the Atlantic by way of Canada to visit the Century of Progress Exposition in Chicago arrived at Washington for a visit to President Roosevelt. Officers numbering 39 of his air fleet accompanied him to Washington in U.S. army planes.

HAPPY JACK TARS ARRIVE FOR BISLEY

Our press photographer, looking around for an optimistic subject to "shoot," bumped into these naval entrants from H.M.S. Pembroke, arriving in Surrey to participate in the National Rifle Association meeting at Bisley. Judging by their faces, the long ranges at Bisley hold no terrors for them.

BEFORE CONFERENCE

Francis Edward Powell, chief of the International Sugar Board, who was called before the Sugar Commission at the World Economic Conference on the sugar situation.

Home and School Federation

Officers Elected at Biennial Convention in Port Arthur

Port Arthur, Ont.—Dr. G. W. Kerby, Calgary, was elected president of the Canadian National Home and School Federation at closing sessions of the third biennial convention here.

Other officers were elected as follows: Vice-President, Mrs. R. S. McLaughlin, Ottawa, Ont.; Provincial vice-presidents: Ontario Mrs. McLaughlin; British Columbia, Mrs. A. E. Deimege, Vancouver; Alberta, Dr. Kerby; acting vice-presidents: Saskatchewan, W. J. Young, Saskatoon; Manitoba John Halstead, Winnipeg; Maritimes and Newfoundland, Miss Dora Baker, Truro, N.S.

Vancouver was chosen for the 1935 convention and the British Columbia federation's campaign was adopted as part of its policy by the organization.

Canadian Business Important

United States Pleaded To Note Recovery Of Canada

New York.—Commenting on the "evidence of wide-spread improvement of business in Canada," the New York Times says:

"That these gains have been made without any plan deliberately to depreciate the Canadian dollar offers further proof of the strength of natural forces now tending to promote recovery."

The Times also notes: "The evidence of Canadian improvement is of special interest to the United States, inasmuch as more American capital is invested in Canada than in any other foreign country, and Canadian markets are second in importance only to those of the United Kingdom as an outlet for American goods."

To Silence Gun

Vancouver, B.C.—The gun whose booming note at 9 p.m. has set Vancouverites to watch-pulling for 39 years, will be silenced after Sunday night next. Its original purpose of supplying time for ships' chronometers having passed, the Dominion Government has decided to save its annual cost in powder of \$350. The gun was cast in 1816 and brought out to defend Esquimalt.

C. C. F. Revolutionary In Character, States Hon. Mackenzie King

Noted British Editor Dead

Viscount Burnham Was Prominent Figure For Many Years

London, Eng.—Viscount Burnham, noted newspaper proprietor, editor and publicist, died suddenly at his home here July 20. He continued his normally active life until two days before his death, when he attended a meeting of the joint select committee on Indian constitution reform, of which he was a member.

Viscount Burnham was a prominent figure for many years in numerous sides of British life. He was 71 years old.

He was best known for his association over a long and important period, lasting that of the Great War, with the Daily Telegraph.

Viscount Burnham virtually grew up in the Telegraph office, under his father, the first Lord Burnham, who died in 1916.

When a few years ago, he sold the newspaper he had been in journalism more than 40 years.

Seek Treasure

Plan To Recover Bullion From Sunk in Lusitania

Chicago.—A plan to salvage the treasure reputedly on the liner "Lusitania," sunk by a German U-boat during the war, was revealed by Charles Courtney, president of the American Association of Master Locksmiths.

Courtney, who is en route to Cleveland, said work will begin in the liner, in the ocean off the Irish coast, as soon as weather conditions are favorable.

Although the ship's manifest, published shortly after she sank, listed no gold, the amount of metal aboard has been variously estimated from \$5,000,000 to \$10,000,000. Courtney said.

Conversion Loan Plan

Great Britain Is Seeking To Convert War Loan

London, Eng.—Great Britain, seeking to convert 5½ per cent. war loan bonds floated in the United States in 1917 into 2½ per cent. sterling bonds, asked the American holders to accept abrogation of the bonds' gold clause.

As an inducement an offer was made of conversion of each old 5½ per cent. \$1,000 bond into a sterling bond of £260—that is, at the rate of \$5.84 against the parity of \$4.86 which the United States dollar and pound exchange rate touched Wednesday.

The bonds were floated just before America entered the Great War in 1917.

Glasgow Nurse In Rifle Shoot

Bisley Camp, Eng.—A Glasgow nurse and daughter of a famous military family, Miss Helen Rottenburgh, was one of the five women competitors as the classic King's prize service rifle match opened in the National Rifle Association meeting. There are nearly 1,000 in the King's shoot and 14 are from Canada.

Winnipeg Police Quell Riot Staged By Demonstrators

Winnipeg, Man.—About 1,000 unemployed demonstrators, bent on airing their grievances over closing of the out-patient department of the Winnipeg General Hospital, stormed the city hall here Thursday in an attempt to interview the civic unemployment relief committee and police reserves were called out to quell the disturbance.

Charging the yelling and milling demonstrators with tear gas bombs, the policemen broke up the demonstration at the rear of the city hall, but the demonstrators quickly ran to the front of the building on Main Street, Winnipeg's main thoroughfare, where they demanded an audience with the civic unemployment relief officials.

Extra police reserves were called out, bringing the number of officers to 150. The mob was slowly edged down Main Street, to a small lane,

Winnipeg, Man.—Plan of the Canadian Co-operative Commonwealth Federation is revolutionary in character. It advocates state control of the great industries of the Dominion and of Canada's financial organizations. It assumes that state control of everything will result in liberty. In reality the effect will be to destroy liberty.

With positive emphasis, Rt. Hon. W. L. Mackenzie King, Dominion Liberal Leader, made these assertions to a gathering of some 300 people who tendered him a complimentary dinner here Friday night. He did not, he said, use the word "revolutionary" as indicating violence on the part of the C.C.F., but while the C.C.F. leaders might not have in mind any violence, Mr. King asked his audience how it would attain its end save by the use of force.

State control of industry and finance inevitably meant that individuals must accept the decisions of those in power as to where they would work, what they would do, and how and when they would do it. And a force would inevitably grow up to see that the will of those in authority was carried out.

Assistance Given Manitoba

Says Province Should Make Own Arrangements For Financing

Winnipeg, Man.—Apart from the financial assistance rendered Saskatchewan in respect of areas in which there was a three-year crop failure, the Dominion Government has helped the province of Manitoba more than any other province, according to a statement issued by Hon. T. G. Murphy, Minister of the Interior, here.

The statement detailed financial aid given Manitoba and claimed in view of the assistance rendered in connection with other responsibilities, it was incumbent on the Manitoba Government to make its own arrangements for financing direct unemployment relief.

Canada Loses At Bisley

Famous Kolapore Cup Goes To Mother Country

Bisley Camp, England.—By the narrow margin of seven points the historic Ralph of Kolapore's imperial challenge cup Friday passed from Canada's possession into that of the Mother Country.

The Mother Country's marksmen tallied 1,115 points out of a possible 1,200 in the match to win the senior team trophy of the Imperial meeting of the National Rifle Association. Canada's team of eight was in second place with 1,108.

Prince's Herd Big Winner

Edmonton, Alta.—The Prince of Wales' herd from High River was again a big winner at the Edmonton challenge cup. The Shorthorn class Princeton Marion won the junior and grand championship, also first on junior get-of-sire, progeny of dam and breeder's herd. Campbell Farms, of Moffat, Ont., showed the senior female champion, which was made reserve grand.

A Little Imperial Economic Parley To Be Held In London

London, Eng.—"A little imperial economic conference" is going to be held at London as soon as the world economic conference is adjourned.

But from all indications all those sources that have been clamoring for an empire economic parley to take the place of the world conference are going to be disappointed. On authoritative information it is learned the empire parley will concern itself only with ways and means of meeting out the complaints that have arisen in various quarters from the working out of the Ottawa Imperial Conference trade pact.

And these complaints will largely

hinge on the widely-publicized unrest among British agriculturists at a declining market they attribute to floods of agricultural produce coming in from the Dominions under the Ottawa pact.

Whether the conference between representatives of the United Kingdom and empire governments will seek to arrive at any agreement on empire currencies, or any further steps towards empire economic co-operation at large, is doubtful. Voluntary agreements—and the "voluntary" is stressed to remove the existing complaints, are said to be the sole aim of the empire meeting.

NOTES AND COMMENTS

WHEREVER the "Reds" may be, there you will surely find trouble. In Drumheller the apostles of destruction stirred up the unemployed married men and they struck from doing relief work. Premier Brownlee, who by this time must have got the true measure of the law-breakers who tried to foment open revolt in the Crows Nest Pass, visited Drumheller and told the men he would go no further in granting relief. The wise counsels of saner heads prevailed after thinking over the Premier's ultimatum, and work was resumed.

PENDING the hearing of an appeal against a year's jail sentence, the star leader of the malcontents is again active in trying to justify himself as a militant advocate of Communism. The Crows Nest Pass again receives a visit, and the mayor of Blairmore travels in company with the "Reds" who would overthrow the constitution.

THE Co-Operative Commonwealth Federation attempts to extend an olive branch to the Reds by proclaiming in its manifesto that it will press for the repeal of the famous Section 98 of the Criminal Code, and it also protests against deportation of undesirable citizens. J. S. Woodsworth, former minister of the gospel, later leader of the revolutionary O. B. U. strike in Winnipeg, now labor member for a city constituency, was very red fourteen years ago, and he is still filled with visionary ideas which he or none of his satellites have the ability to put into effect. A pretty kettle of fish!

WHILE pressing for the right of free speech for everyone, white, black or red, the C. C. F. convention prohibits individual opinion within its own ranks. No local committee may declare itself without first submitting its views to the central executive of which the former Vancouver longshoreman is the head. That is one thing to which the ranks of organized labor in Canada will never submit. The C. C. F. manifesto is so full of inconsistencies that it dispels whatever vestige of hope it may hold for the era of a golden day for the workers.

"WHAT TOWN is this?" This question comes as a mild shock to service station attendants when a car draws up for gasoline. The first town in Alberta coming from the west, and the second highest in altitude in the province receives a jolt to its dignity when travellers fire this question at the inhabitants. Yet, what is there to denote it is Coleman or Kalamazoo? Not a sign east or west. A suggestion that large signs be placed at the east and west entrances to the town had as much effect as oil on a duck's back. Even on the main street one has to look around very intently to find the name of the town. A community of 3,000 people in most places would be shouting so loudly that visitors would imagine there was a young metropolis in the making. We are very reticent people when it comes to letting people know who we are and what we've got.

EVERY TRAVELLER who stops for only a few minutes invariably spends money. A few hundred will help the cash business of the town. The significance of tourist traffic is not fully appreciated in smaller centres. Larger places compete keenly for it. If the merchants of this town combined in an effort to induce travellers to stop and have a look around, they would probably find a nice addition to the summer's business. Reflect how, when you are on the road, impressions are quickly made by appearances of the places you pass through.

AN EXAMPLE of diligence which hard times, low prices and adverse weather cannot subdue is that of Frelan Wilford of Stavelly, who won the wheat crown as champion at the World's Grain Exhibition at Regina, in competition with entries of many countries. Prizes such as this are won only by concentrated perseverance with an ideal in view; to do something better than has ever been done before. Victories always carry inspiration to others, equally in peace as in the less desirable field of war. Alberta citizens join in acclaiming honor due to the world's wheat king, and Coleman in particular remembers with pride that Herman Trelle, former school boy here, now farming at Wembley, was awarded second prize.

ANOTHER notable feat arousing the admiration of the world was Wiley Post's successful solo flight by air from New York around the northern hemisphere. Everyone with sporting instinct followed this intrepid pilot's travels from day to day, and when the radio on Saturday broadcast his arrival at Floyd Bennett field in New York, millions involuntarily murmured their thanksgiving that a brave man had again succeeded in his self-imposed task.

STONEBORD means Fireproof.
Absolute protection plus insulation against heat or cold. Damp proof and harder, a wall surface that resists soot and takes all finishes. Will outlast any other wall-board made, cost less. In stock at **J. S. D'APPOLONIA**.

Gigantic Battle Against Bovine Tuberculosis Being Waged By The Department Of Agriculture

Over 1,000,000 tuberculin tests were conducted on cattle in Canada during the past year, it was stated by Dr. G. Hutton, veterinarian, general of the department of agriculture. Almost 1,000,000 cattle will be retested this year and between 10,000 and 15,000 new herds added. With Canada's cattle population approximately 9,000,000 and her milk cow population slightly over the third of the total, the battle to free Canadian herds from tuberculosis is a gigantic one.

The department is discontinuing altogether this year compensating farmers whose cattle react to the test if they are under the municipal herds. However, under the other policies the compensation will be paid as heretofore.

The object of the department is not primarily to protect the health of the public by this battle against bovine tuberculosis. The protection of the health of the people is a provincial and municipal matter. It is for the provincial and municipal authorities to see that milk and milk products, free from tubercular germs, are provided to the consumers of the Dominion. These authorities are responsible that the pasteurization is effective and impure milk kept from the public.

The primary object of the agricultural department is to "reduce the economic losses in livestock because of tuberculosis."

When the fight against bovine tuberculosis first started in this country, it was in what were known as supervised herds. In this the government tested the herds but did not pay any compensation for the cattle that were weeded out. That is still in force and nearly 20,000 herds will be dealt with this summer plan in 1914. Under it a municipality took steps to insure that all the milk sold within its borders was from tubercular-free herds. The government tested any herd from which milk was sold to the corporation making the application. Some 28 municipalities originally went into the scheme and the government tested the herds. The farmers were compensated for loss of the reactors.

For some time it has been felt that this was a very ineffective method of fighting the disease and a very expensive. Accordingly some eight or nine years ago the department decided to carry on with the municipalities already in the scheme but to accept no more applications. Now, however, the entire scheme has been dropped in favor of the restricted area plan, the accredited herd plan and the supervised herds.

One of the arguments against the municipal plan was that only herds supplying a certain municipality would be tested. "All around it were cattle in herds not so tested. The owner of the tested herd was continuously replacing milkers in his herd with milkers he bought elsewhere. The result was that the herds would not stay free of the disease and the number of animals which had to be slaughtered was great with a correspondingly heavy compensation bill for the government with very little progress."

Under the restricted area plan however entire areas are cleared of tubercular cows and county after county has gone in for this plan with its compensations.

The accredited herd plan, an informational agreement whereby herds with purebred animals for sale are tested and compensation given for animals destroyed will remain in force.

Much Depends On Teacher

The "little red schoolhouse" is not yet extinct. A recent survey shows that 60 per cent. of the public school buildings in use today in the United States are of the one-room variety. In Canada, the percentage is even higher. And probably the children in them get a pretty fair education. The odds are not wholly in favor of the fine, graded city schools. More depends upon the teacher than upon the school.

Exchanging Courtesies

The days rugged of journalism are not over. Down in Nova Scotia the Evening News of New Glasgow said there were four goats in the livestock census of pictou county, "not counting the editor of the Eastern Chronicle," and the latter retaliates by remarking there were 3,349 swine and "should that not read 3,500 including the editor of the Evening News?"

W. N. O. 2004

To Enforce Act

Grading and Stamping of Beef On Compulsory Basis in Saskatchewan
Saskatchewan is putting teeth into the Federal Livestock and Livestock Products Act, which provides for the grading and stamping of beef.

By a provincial order-in-council, passed on June 6, the regulations contained in the federal order-in-council which has been in effect for the past two years, have been made compulsory.

In other words, the regulations which have been operating on a voluntary basis are now placed on a compulsory basis with the onus on enforcement upon the federal government.

Publication of the provincial order-in-council, together with the regulations, as set out by federal enactment are controlled in the current issue of the Saskatchewan Gazette.

First Impression

Biggles visited London for the first time, and on his return was asked by his friend Smith what struck him first about the Metropolis.
"The traffic," replied Biggles; "and my next impression was a cool hand on my brow, a smell of antiseptic, and a voice asking me if I felt better."

Winnipeg Newspaper Union

LOTS OF GRACE ABOUT THIS JUMPER DRESS WITH TRAY SHOULDERS

An interesting feature is the soft becoming neckline. Its lines are slenderizing too.

Soft crepe silks, either plain or printed, are lovely for this model.

Carried out as the original, you'll use plain crepe silk in beige for the dress with a brown and white print for the gumpie.

Red and white crepe silk print jumper with plain white gumpie is cute idea.

The dress can also be worn without the gumpie.

Its simple styling makes it very suitable for cotton fabrics and tub silks in white or pastel shades for your summer wardrobe.

Style No. 732 is designed in sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards of 39-inch material for dress with 2 1/2 yards of 35-inch material for blouse.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap cut carefully.

Complete Cooling Of Milk

Desirable To Have It Done Quickly As Feasible

While milk should be cooled as promptly as possible in certain cases the morning's milk must leave the farm so early that complete cooling is impossible. Often the only alternative is to hold this milk over until next morning before shipping. In more progressive communities it is realized that the fresh milk, although warmer, is more desirable than the older milk, and regulations have been framed to allow for the acceptance of uncooled or partially cooled morning's milk which is not more than two or three hours old on arrival at the plant. During this period the substance is freshly drawn milk known as lactacin serves to restrain bacterial growth. However the exhaustion of the lactacin from delay in cooling ultimately results in a shortening of the time the milk will keep. Hence it is highly desirable that the cooling process be carried out as far as possible before the milk leaves the farm—Dominion Agricultural Bacteriologist.

Western Forage Crops

Pasture Crops Occupy Only About Five Per Cent Of Cultivated Land

The amount of cultivated land devoted to forage crops in the three Prairie Provinces has been relatively unimportant as compared with the total area which has been seeded annually. The statistics which are available show that hay and pasture crop occupy in the neighborhood of five per cent, about half of which, or 1,000,000 acres, is improved pasture. These figures taken by themselves, however, say Dr. L. E. Kirk, Dominion Agricultural Bacteriologist, in that they do not include cereal crops which are pastured or harvested in the sheaf for hay. The latter in Western Canada is very important. Oats alone are grown more extensively for feed than all other forage crops combined. No estimates are available of the uncultivated pasture lands, which are very important also and are chiefly responsible for the limited acreage of improved pasture. About 7,000,000 acres of ranching country are leased for grazing purposes.

New Type Of Street Car

A new type of street car, capable of a speed of 40 miles an hour, has been built in Blackpool, England. It has a stream-lined body, a sliding roof, headlights and horn like a motorcar, doors at the sides for quick loading and unloading. The car, which has cost £2,000, can be electrically heated in winter. It has been built largely to the design of Blackpool's new transport manager, W. Luff.

A Resourceful Trader

Tom Harvey, veteran trader of Cumberland House, 100 miles west of The Pas, Man., has created a new record for unusual freighting sights on the Saskatchewan River. Mr. Harvey needed a dwelling near his store, and having one in The Pas, decided to move it into the hinterland. It was loaded on two scows and towed by gasoline tug.

An Example To Europe

Norse Countries Have Preserved Peace For Over Century

For more than a century peace has reigned in the Scandinavian and Baltic countries. No war has ruffled the neighborhoods of these nations for almost 125 years.

Sweden, Norway, Denmark and, further south, Holland, practiced the spirit of the Briand-Kellogg anti-war pact for more than a century before that document came into existence, a political writer on the daily Morgenthauser reminds his readers. There is no counterpart to this phenomenon in the rest of Europe, he says.

Two facts he regards as especially interesting are that this north-western peace atmosphere of Europe has not arisen from written treaties, but from an attitude of mind and that it has shown a tendency to stop the spread of European thunder storms to the north-west and will most likely continue to do so.

Carries Radio-Phone Set

New Idea For Reporters Is Giving Entire Satisfaction

New Idea For Reporters Is Giving radio-telephone set has received its baptism of reportorial fire and acquitted itself admirably.

The set weighs 35 pounds and is carried on the back of a reporter. It has a sending range of about four miles. It uses less than two watts power and operates on ultra-high frequency waves.

The midget set received its first real test under actual reportorial conditions, when used by George Kirksey, sports writer, during the A. A. U. track and field championship at Chicago recently. Using the set Kirksey was able to flash to his telegraph wire located at the judges' stand the results of many events even before the A.A.U. timers could cover the distance from the finish lines to the judges' stand.

Comfort For Spectators

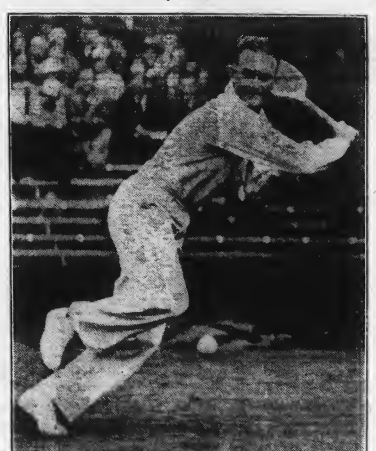

Winter Sport Enthusiasts In Switzerland Enjoy Heated Grandstands

Grandstands for the accommodation of winter sport enthusiasts in Switzerland are now being heated electrically. In one such stand, insulated cables are placed in rows of three under the seats. The strips radiate a uniform heat, and only a short time is required to heat the entire stand in this manner. In order to avoid short circuits, every cable length is grounded through an automatic switch which immediately disconnects the endangered section. The current is supplied by the same power plant which makes the artificial ice for the skating rink or other sport.

Danced For Rain

Who said there wasn't anything to this thing of dancing for rain? Recently there were a few skeptics at the latest Indian Pueblo, Albuquerque, New Mexico. They scoffed, but in a few minutes it rained so hard that the skeptics couldn't see the dancers. The Indians must have overdone themselves, for flood waters from an arroyo covered about 1,000 acres of their land to a depth of several feet.

VINE'S CONQUEROR IN ACTION

Here is an excellent action picture of Jack Crawford who performed the iron man feat in the final of the All England Men's Singles Lawn Tennis Championship by defeating Ellsworth Vines, United States titleholder. Crawford, who hails from Australia, has been in the front ranks of tennis stars for a number of years but this is the first time he has won the British title. The match between the Australian and United States champion went to five sets with Crawford showing much superiority in the final set.

Scientific Investigations Will Feature Work Of Government Expedition To Arctic Archipelago

Concerning Sleep

Scientists Investigating a Most Prolonged Subject

Sleep that slides into the soul is not always vouchsafed even to those persons who have their consciences under perfect control. Sleeplessness, might have its brighter side if human beings were kind enough to listen to the tale next morning of how "I hardly slept a wink last night," but they never are. Dr. A. T. Mathers has been talking the whole thing over with the Pacific Northwest Medical Association at its meeting in Vancouver.

It appears that the same old flock of sheep are still doing duty. Well, perhaps not the same flock, for the Doctor seemed to be "choosy" about his sheep. Quality is what he is after. He advised every one sleeper to make sure of each sheep before it passed through the gap or over the fence. Give each one a careful once over, is the Doctor's recommendation. But how is the uninitiated to tell one sheep from another unless it be the blacks from the whites? The speaker made no suggestion along this line. Further, the Doctor said that one could fall back on hot toddy if the wool market broke.

Take it all in all, the sheep and today are not very new ideas. If science really wishes to do its stuff it might suggest how to secure at twelve p.m. the delicious sense of drowsiness that enfolds one about eight a.m.—Winnipeg Free Press.

Ration For Growing Pigs

Meal Mixture Recommended By Dominion Department Of Agriculture

For growing pigs, 80 to 150 pounds live weight, the following meal mixture is recommended by the Swine Division of the Dominion Department of Agriculture: Ground oat, 200 pounds; ground wheat, 200 pounds; tankage, 50 pounds. When the price of wheat is relatively high, one-half of the wheat may be replaced by equal quantities of oats and barley. As soon as pigs reach 150 pounds in weight, they are then ready to fatten. With regard to the feeding of fattening pigs, 150 pounds to 210 pounds, the following meal mixture has been found by experience to be most useful and is recommended by the Division: Ground oat, 300 pounds; ground barley 750 pounds; tankage, 50 pounds. When the price is low enough, wheat may replace part of barley. When available, the addition of three per cent. fat-need will improve the meal mixtures for weaning and fattening pigs.

Fifty Miles Of Roses

Garden At Kasanlik, Bulgaria, Is Largest In World

Amateur gardeners are now boast of their fine roses—with some justification. In most cases this year. The right answer to the question is to retort with a reference to the REAL rose gardens at Kasanlik, Bulgaria, the largest in the world. Around Kasanlik it is possible to ride for fifty miles and see hardly any plants but rose-trees. There are more than a hundred villages in the district and nearly all the inhabitants are engaged in making attar of roses—the chief reason of course, for the existence of the gardens.

Fifty miles of roses make our own suburban gardens seem pretty insignificant—London Sunday Pictorial.

Constitutes A Record

Mackintosh of Mackintosh who is 82 years of age presided at the annual dinner of the London Inverness-shire Association the other night for the fifty-second year in succession—a record. He is enjoying his visit to London immensely. The Mackintosh is a close friend of the King, and in proposing royal toasts he always makes a brief reference to the King, the Queen, the Prince of Wales, the Princess Royal, and other members of the royal family—an unusual custom—Glasgow Herald.

Daylight Saving In Finland

Finland is the latest starter north of the Equator so far as summer time is concerned. The clocks did not go forward until June 20th. South of the Equator, of course, summer time doesn't start until September or October, and carries on through our winter. In one country it's always daylight saving time. In Soviet Russia all clocks are one hour in advance permanently—summer and winter.

The Department of the Interior's

1933 expedition to the eastern islands of the Canadian Arctic Archipelago sailed from Montreal on board the Hudson's Bay Company's steamship, "Nascopee," on the morning of July 8, beginning one of the most extensive patrols undertaken in many years. This year's visit to the northern posts will be extended to points in Hudson and James Bays and in addition to the regular inspection will also make a study of plant life, mineral occurrences, and parasites. It is expected that the voyage will cover about 12,000 miles and will be completed late in September or early in October.

Major D. L. McKend of the Dominion Lands Administration is again the Officer in Charge with Dr. W. E. B. Bannan of the Department of the Interior, an assistant. Mr. A. Philip Norton is Secretary and Historian; Dr. J. A. Bidwell, Department of the Interior, Ship's Doctor during the northward patrol; Dr. M. O. Malte, Department of Mines, Geologist; Dr. J. A. Bidwell, Department of Marine, Meteorologist; Dr. H. C. Cumming, Department of Mines, Geologist; Dr. Ivan W. Parrell, Macdonald College, Parasitologist; and Captain T. F. Smellie, Ship's Master. Dr. Bidwell, the Ship's Doctor on the northward voyage, will disembark at Pangnirtung, Baffin Island, to continue the work of Dr. L. D. Livingstone as medical officer on Baffin Island. Dr. Bidwell will remain there for two years. Dr. Livingstone is returning to Ottawa with the expedition.

Inspector T. V. Sandys-Wunsch is in charge of the Royal Canadian Mounted Police party with the expedition which consists of the following: Corporals W. G. Kerr and H. Kearney, and Constables S. S. Spalding and A. E. Fisher. Corporal Kearney will join the detachment at Craig Harbour, Ellesmere Island, while the others will relieve members of the force at other posts who have completed their tour of duty in the North.

Eighteen ports in all will be visited by the ship. During the voyage the supplies contributed to the company trading centres particularly in Hudson and James Bays. The first call after leaving Montreal is made at Cartwright, on the Labrador Coast, followed by Port Burwell at the entrance to Hudson Strait, and the following points in the order named: Lake Umbagog, Lake Umbagog, Wolstenholme, Cape Smith, Port Harrison, Charlton Island, Churchill, Southampton Island, Dorset, Lake Harbour, Port Burwell, Dundas Harbour, Craig Harbour, Pond Inlet, Clyde River, Pangnirtung, Cartwright, and St. John's, Newfoundland. The usual call at Godhavn, Greenland, to exchange courtesies with the Danish officials there will be made on the return part of the patrol possibly after the call at Clyde River, Baffin Island, Lake Harbour, Pangnirtung, and Pond Inlet are on the return. Lake Umbagog is on Devon Island, and Craig Harbour is on Ellesmere Island. They are all Government posts and among the chief objects of the expedition is to re-provision these posts and to effect changes in the personnel.

Dr. Malte, the botanist with the expedition, will make the entire voyage. Dr. Cumming, geologist, will leave the ship at Cape Smith on the east coast of Hudson Bay and cover the area between there and Wolstenholme at the western entrance to Hudson Strait, joining the expedition when the boat makes its second call at the latter port. Dr. Parrell, parasitologist, will disembark at Charlton Island and carry on his studies in that area returning a uth by rail from Noosnoes.

All Metal Homes

New Process For Making Marble-Surfaced Steel

Preparing for an era of all-metal homes, the Mellon Institute announces a new marble-surfaced steel. The stone effect is imitation, made by a laminated resin surface woven inseparably with the metal. Any other finish made with the new laminated resins can be added. In this manner, it can be made to imitate wood.

Decorative finishes already are applied to steel by other methods, the announcement states, but says this is the first process to make the surfaces such an integral part of the metal. The advantage of this alloy, such as tin or zinc, which fuses with the steel and the covering.

WORLD HAPPENINGS
BRIEFLY TOLD

The four-power European peace pact has been signed here by Premier Mussolini, and representatives of France, Germany and Great Britain.

Sixty Jersey cattle, including three bulls, valued at more than \$10,000, left Jersey on their way to their new owners in Canada and the United States.

Drought in parts of Southwestern Africa is now in its eighth year, and many farmers have been ruined while others are trekking over the country with their cattle in search of grass.

During the four weeks ended June 30, Canadian grain exports through New York totalled 2,425,000 bushels, a decline of 2,027,000 bushels from a year ago.

With several thousand men on the waiting list desiring of entering the Royal Canadian Mounted Police, the list has been practically closed for the time being.

Edmonton has the most air-minded city in Canada, according to Col. George A. Drew, of Toronto. Addressing the Empire Club at Winnipeg, Col. Drew said Fort McMurray, north of Edmonton, was the greatest aviation center in Canada.

There was a very definite pick-up in the exports of Canadian agricultural products to the United States in June, the value of the total being \$546,000 compared with \$217,000 in June, 1932, a report of the Dominion Bureau of Statistics said.

The "Royal Scot," crack British railway train now on show at the Chicago Exhibition, will likely visit Winnipeg this fall after the close of the Chicago Fair, according to a letter received by Mayor Ralph Webb from the Montreal representatives of the London, Midland and Scottish Co.

With an Anglo-Russian economic warfare ended as a result of negotiations between Maxim Litvinoff, Soviet Foreign Commissar, and S. R. Simon, Secretary for Foreign Affairs, Great Britain is looking forward to a greatly increased export trade with the Soviet Union, officials said.

Parasitological Research

McGill University To Investigate Parasitic Diseases Of Domestic Animals

Last year's report of the Empire Marketing Board referred to a decision of the board to share with the National Research Council of Canada the cost of maintaining an institute of Helminthology (study of maw and intestinal worms) at Macdonald College, McGill University, Montreal, for the investigation of parasitic diseases of domestic animals.

The laboratory buildings have been completed and equipped during the year with funds provided by the Quebec Government. Dr. T. W. M. Cameron, formerly of Edinburgh University, has been appointed director of the institute and work started on April 1, 1932. The establishment of the institute has been welcomed by agricultural and lay opinion in Canada. The administration of the work is under the control of a specially appointed associate committee on Parasitology of the National Research Council, of which Dr. H. M. Tory president of the council, is chairman.

Prince Buys Sixth Plane

Newest Machine Has Armchair Seats For Passengers

The Prince of Wales has purchased another aeroplane—his sixth. The new machine is a De Havilland Dragon Moth, with a maximum speed of about 130 m.p.h.

It is a biplane with six arm-chair seats for passengers in the cabin, and separate accommodation for the pilot in the cockpit. The arm chairs are upholstered in scarlet leather and the cabin is decorated in fawn and red. The plane is two-engined with 260 h.p. It is finished, like all the prince's planes, in the red and blue of the House of Windsor.

Flight-lieutenant F. H. Fielden, the prince's personal pilot, took the machine across the channel on a test flight. The prince intends using it himself.

Egypt Building Big Dam

The British firm of Messrs. J. W. Gibson, has been awarded by the Egyptian Government the big contract of building the Gebel Aulia dam, a few miles south of Khartoum. Their tender was for \$10,390,430.

Four firms, all British, tendered for the contract. It is estimated that the building of this dam will increase Egypt's cultivable land by 300,000 acres, and will take four years.

Famous Liner Scrapped

After considerable delay the liner "Baltic," once a renowned floating palace of the Atlantic service, is being scrapped in the shipbreaking yards at Osaka, Japan. The ship, which had been purchased at auction, arrived there last March, but before it could be towed into the harbor the shallow water bed had to be dredged to a depth of more than 19 feet.

By Ruth Rogers

FOR MATRONS OR YOUNGER WOMEN WHO FEEL THEY CAN SUPPORT SLIMMING LINES

Here's a snappy Paris model you can make at just the cost of the material.

It is a dress you can wear and wear and always look smart.

It is a black and white conservative checked soft crinkly crepe silk. It depends entirely on its lines for its smartness. It needs no further adornment.

It has the slimming wrapped bodice and interesting curved hip seaming to lengthen the silhouette. The sleeves not too full, puff just above the wrists which gives a certain grace to the hands.

Printed or plain crepe silks are equally smart to fashion it.

Style No. 529 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 38 requires 4 yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap copy carefully.

Shined Thousands Of Shoes

Colored Man Has Been Railway Porter Forty-Six Years

In forty-six years of service as a porter at the union station of the Maine Central and the Boston and Maine railroads, in Portland, Moses Green, colored, figures he has put a bright gloss on approximately 671,000 shoes, and grinded for 335,000 customers.

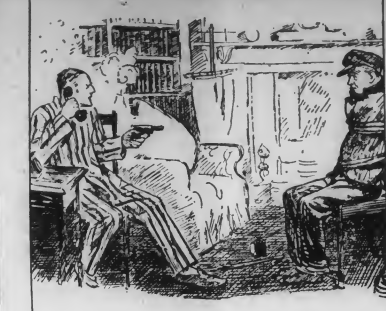

What's more, he figures that about \$1,569,500 worth of shoe leather has gone under his polishing cloth. He is known to travellers from all over the world who come to Maine for their vacations.

Bad Times Man-Made

Dr. Beaumont, English poet, wrote in the seventeenth century "If we would rightly scan, it's not the times are bad, but man." The comment is still correct. Messes are mostly man-made. There is an occasional catastrophe brought by the forces of nature. But natural disasters do not measure in effect with man's economic social, political blunders. We are tripped by our own stupidity.—Brandon Sun.

Famous Liner Scrapped

After considerable delay the liner "Baltic," once a renowned floating palace of the Atlantic service, is being scrapped in the shipbreaking yards at Osaka, Japan. The ship, which had been purchased at auction, arrived there last March, but before it could be towed into the harbor the shallow water bed had to be dredged to a depth of more than 19 feet.

HOUSEHOLDER: "And, as a lawyer, I can assure you that your sentence will be no light one."

INTRUDER: "I've got to 'and it to you, Guv'nor. You're a real smart feller. I suppose you wouldn't care for the job of defendin' me?"

Old Document Found

Letter Written in 1870 Offered Judgeship To Nova Scotia Senator

A letter in which Canada's second premier, Alexander Mackenzie, offered a judgeship to Senator William Miller of Arichat, N.S., in 1876, has been found and presented to the provincial archives.

Written in the premier's hand-writing, the letter reads:

"My Dear Sir: We expect within a few days to make the several appointments to the county court in Nova Scotia as the local government desires to issue the proclamation provided for by the statute."

"I write to request you to allow me to submit your name to his excellency for the Cape Breton district."

"Mr. Blake left for England three weeks ago, or he would have communicated with you on the subject. I know, however, that your nomination will be entirely satisfactory to him, and I have every reason to believe that it will give general satisfaction in the district and in the province."

"I will feel greatly obliged by receiving your early answer, and remain, My Dear Sir, Yours Faithfully, A. Mackenzie."

Heavy Tourist Travel

Indications That Visitors To National Park Will Equal Peak Year Of 1929

Tourist travel in Canada's national parks this season has given indications of equalling in volume the peak year of 1929, according to information reaching Hon. T. G. Murphy, Minister of the Interior. The first day of July marked the opening of the season in most national parks, particularly in the Rocky Mountain region, and the number of visitors over the Dominion Day holiday is usually taken as an indication of what the season will produce.

At Banff national park in Alberta, all available accommodations were occupied on Dominion Day and many tourists slept in their cars it was reported.

These have been wonderful years for the type of young married people who are drawn closer by early struggle.

It's as simple as this. The nations must come to peace or go to pieces.

Recipes For This Week

(By Betty Barclay)

CHEESE SOUFFLE

- 3 tablespoons quick-cooking tapioca.
- 1 cup milk, scalded.
- 1 cup grated cheese.
- 8 egg yolks, beaten until thick and lemon-colored.
- 8 egg whites, stiffly beaten with 1 teaspoon salt.

Add tapioca to milk, and cook in double boiler 15 minutes, or until tapioca is clear, stirring frequently. Add cheese and stir until melted. Cool. Add egg yolks and mix well. Fold in egg whites. Bake in greased baking dish, placed in pan of hot water, in moderate oven (350 degrees Fahrenheit). Souffle is done when it shrinks a trifle and is brown. Serve 4.

When made with quick-cooking tapioca and properly baked, souffles do not fall, but stay tender, moist, and light while being served.

RASPBERRY ICEBOX PIE

- 1 cup small vanilla wafers, rolled fine.
- 1 package raspberry gelatine dessert.
- 1 pint raspberries.
- ½ cup cream, whipped, sweetened and flavored.

Roll wafers fine and line buttered pie plate with the crumbs. Prepare gelatine according to directions on package. Chill and when beginning to set, pour into crumb lined plate and chill. When set add a layer of fresh raspberries and cover with whipped cream. 8 portions.

Not Human Nature

The shop assistant whipped up the customer's parcel and deftly handed it to him.

"There you are, sir," he said, "and if the goods are not just to your liking we will cheerfully refund the cash."

Farmer Giles sniffed.

"Don't ye tell me such a yarn, young man," he replied.

"Er? What?" exclaimed the assistant, momentarily taken off his guard.

"Ye might gi'e me my money back," said the farmer, "but 'tain't human nature to be cheerful about it."

It is estimated that there are nearly 125,000 kinds of flowering plants.

SUNDAY SCHOOL LESSON

JULY 30

GIDEON

Golden Text: "Jehovah is the strength of my life: Of whom shall I be afraid?" Psalm 27:1.

Lesson: Judges, Chapters 6-8.

Devotional Reading: Psalm 98:1-4.

Explanations and Comments

The Faith-Hearted Depart, verses 1-4.—Gideon and his band were to fight the Midianites under God's banner, and to God must be accorded the victory. Let them should boast of having themselves defeated the enemy, their numbers must be reduced. Gideon therefore directed all who were fearful to depart, and more than two-thirds of the warriors left the camp. Possibly the men who had braved most of what they would do to the Midianites were the very ones who were afraid when they stood on the heights and looked at the encampment of the enemy spread along the opposite side of the valley.

The Crusaders who were the boldest in the council-chamber were the first to cry, "Sauve qui peut" (Let him who can, save himself!).

When God needs men for His work He chooses the hearts courageous. When the huge sound the martial note, some one has observed, there are many in the Church who suddenly remember an engagement that prevents their joining in the battle. The proportion of cowards at Gideon turned out to be two in three. Would it be as low in the moral battlefields of today?

The Force Reduced To Three Hundred, verses 4-8.—"The number of God's army looked well, but God took to auditing it; He audited the figures, and a most savage audit it was" (McNelly). Gideon brought his army to the water and there tested them further. All but three hundred "bowed down upon their knees to drink."

The Hebrew for this is said to mean strictly "to drink by putting the mouth in the water," as, for example, a horse or an ox does. Three hundred of them carried the water to their mouths with their hands, "lapped it with their tongues, as a dog lappeth," and they were the men chosen to fight.

Mass Harper, great admirer of Canadian landscape, has painted scenes as far north as Hudson Bay and includes in the present exhibition pictures done at Windsor, N.S., Ottawa, the Rockies and as far west as Vancouver. Among her subjects are: "Mount Edith Cavell," "Mount Robson," "Great Teton, Stanley Park," "A Sunrise on Hudson Bay," "Moose Factory," and "Scenes on the Moose River in Northern Ontario." "The Lions, Vancouver," "Grouse Mountain," "Lake Louise and Emerald Lake."

Capture in her strong water colors of Canada's brilliant atmosphere as well as the country's more sober moods occasioned much favorable comment. Her show contains also pictures painted in New York and in the West Indies.

An African Superstition

Natives Believe Babies Should Be Smoked Over Fire

One of the most peculiar tribal customs among natives of darkest Africa, is the superstition that a baby must be held over the smoke of a camp fire in order to be "pure" and such a baby must not associate with one which was not "smoked" as an infant.

Such was the report of Miss Ruth C. Cowles, R.N., at Johannesburg, South Africa, a nurse of the American Board of Commissioners for Foreign Missions. She is a native of New Britain, Conn., and her parents live in Alhambra, California.

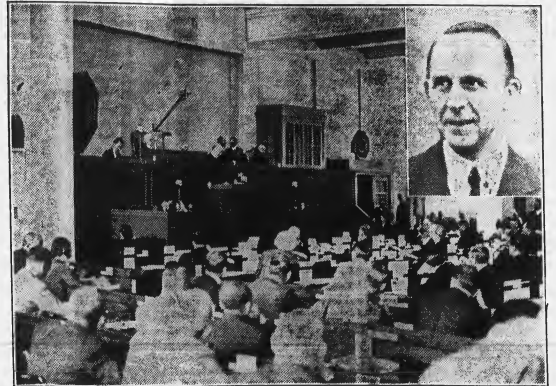

"But we are gradually proving," Miss Cowles wrote, "that such superstitions are groundless, and that, smoked or unsmoked, are safe in the hands of our native Christian nurses."

Chinese Buying Planes

Three thousand fighting aeroplanes will be placed in service in the next three years by the Chinese Nanking Government, General Chih Jon Chow, young commander-in-chief of aeronautics, announces. General Chih said he was examining various types of planes in the United States.

If you print any more jokes against Beethoven I shall cease borrowing your paper," writes a man from Aberdeen.

IRISH DELEGATE REPROVED BY CONFERENCE CHAIRMAN

A sensation was caused in the economic commission of the World Economic Conference when Hendryk Colijn, Dutch Prime Minister, as chairman of the commission stopped Joseph Connolly, Irish Delegate, from speaking. Mr. Connolly (above inset) was supporting the Soviet proposal for an economic treaty and began an attack on Great Britain's economic actions against the Irish Free State. Premier Colijn interrupted to advise Mr. Connolly not to stray from the subject under discussion and the Irish delegate sat down. Our main picture shows Premier Colijn indicated by arrow.

Fine Piece Of Legislation

Special Permission Required To Carry Firearms In Canada

One of the finest pieces of legislation that have been passed in many years is now in force, and hereafter no one in Canada is permitted to carry firearms without special permission. We are fairly clear of the Southern European habit of carrying knives, but the very bad habit of carrying guns, revolvers and other forms of pistols, automatics, etc., has crept over from the United States and leads often to fatal results. In our quarrels, which were properly confined to the good old British weapons of the fists, would be comparatively harmless.

Foreigners from the less civilized parts of the world, seem to think that guns are necessary in Canada, but such is not the case, and most of us can go through life without ever seeing one of these weapons, and certainly without having to use one.

When it is widely known that guns are no longer lawful, and those who carry guns become objects of suspicion, it will be better for all concerned. Even thieves and burglars do not need guns. They are not used in Britain except by imported American criminals, and the police do not need them to use them either.—Hamilton Herald.

Canadian Landscapes

Exhibition Of Water Colors Shown In England

London's gallery-goers are showing keen interest in an exhibition of water colors, many of Canadian scenes, being shown at the Graham Gallery in New Bond Street by Miss Elizabeth Harper, of the Overseas League. Queen Mary is among those who have attended the show.

Mass Harper, great admirer of Canadian landscape, has painted scenes as far north as Hudson Bay and includes in the present exhibition pictures done at Windsor, N.S., Ottawa, the Rockies and as far west as Vancouver. Among her subjects are: "Mount Edith Cavell," "Mount Robson," "Great Teton, Stanley Park," "A Sunrise on Hudson Bay," "Moose Factory," and "Scenes on the Moose River in Northern Ontario." "The Lions, Vancouver," "Grouse Mountain," "Lake Louise and Emerald Lake."

Capture in her strong water colors of Canada's brilliant atmosphere as well as the country's more sober moods occasioned much favorable comment. Her show contains also pictures painted in New York and in the West Indies.

An African Superstition

"But we are gradually proving," Miss Cowles wrote, "that such superstitions are groundless, and that, smoked or unsmoked, are safe in the hands of our native Christian nurses."

A Mystery

Safe Stolen Two Years Ago Is Found On Prairie

Believed to be the same safe stolen from Harnsworth, Sask., two years ago, a safe was "blown" on prairie land, near the Black Hawk mine at Blentfort, about the week-end, according to word reaching R.C.M.P. headquarters at Regina. There was nothing in the safe but papers.

During the two years elapsing since the Harnsworth safe was stolen, no trace of it was found. Mounted police are working on the theory that those responsible for the theft secreted the safe on the prairie near the Blentfort mine where it was found and "blown" by a second gang over the week-end.

Exhibit Draws Crowds

Canada's exhibit at the Century of Progress Exposition, Chicago, is drawing a daily attendance of approximately 15,000 persons, according to information reaching the Department of Trade and Commerce. This number represents about 15 per cent. of the total daily attendance at the exposition.

ONLY FIRESTONE gives you all these EXTRA VALUES

Twenty-five to Forty per cent. longer tire life at no extra cost . . . that's the bonus you get for buying Firestone Tires.

Firestone does not cost one cent more than ordinary tires, but only in Firestone tires can you get a combination of Gum-Dipped Cords, 2 Extra Cord Plies under the tread, Balanced Construction and a scientifically designed Non-skid tread which make for extra strength . . . extra safety and extra mileage.

Firestone Tires are guaranteed for 12 months against blowouts, cuts, bruises and all other road hazards except punctures.

Replace worn tires today. Buy Firestone . . . the strongest, safest and most economical of tires. See the nearest Firestone Dealer to-day.

Spirit Of The North

No City In Canada So Air-Minded As Edmonton, Says Col. Drew

There is no city in Canada so air-minded in a practical way as Edmonton, Col. G. A. Drew, of Toronto, told members of the Empire Club, whose guest he was at dinner.

Edmonton, Col. Drew said, is like a seaport to and from which ships come and go. Its people are airplanes in and out daily with passengers, mail, express and freight bound for all parts of the North West Territories, and they have a spirit of optimism, related to that activity and to the very real expectations they have of the Territories.

At Fort McMurray, now the greatest centre of aviation in Canada, with 15 or 16 big commercial airplanes flying in and out every day, they have captured the spirit of a great adventure, Col. Drew continued, and he recommends a stay there as a cure for anybody suffering from the mental effects of the depression.

Nowhere else has he found people with the tremendous keenness and interest in their work as the airman in Fort McMurray, he said. Their conversation is always along the lines of how air transportation can be improved, and he predicted that when the expansion of aviation comes which he is certain will come, these men will be found occupying the positions of responsibility.

Col. Drew is on his way back to Toronto after a trip of nearly 6,000 miles by air in company of George M. Ross, executive secretary of the

Gum-Dipped Cords
with every fibre of every cord coated and saturated with rubber have 50% longer lasting life.

2 Extra Cord Plies
under the tread gives 35% extra protection against blowouts, cuts, bruises and punctures. The extra cord gives the tire extra safety at any speed.

25% more Non-Skid Wear
The Firestone tread is wider, deeper and scientifically designed for extra traction and safety.

Congress Of Women

Meeting In Chicago Will Make Attack On World Problems

If all the women's clubs were to close up for five years, said Miss Lena Madelin Phillips, who opened an economic conference in Chicago, the representative of the world's best feminine minds, there would be more women holding public office. Miss Phillips hastened to add, however, she approved women's club work, but said instead of passing resolutions they should get down to actual work if they expected accomplishment.

Her remark was made as she discussed informally the objectives and significance of the International Congress of Women, which has drawn delegations to Chicago, many of whose members have achieved high recognition in their own countries, from 30 different countries, Canada among them.

The congress, which is believed the first at which women will make a direct attack on world problems, was called by the National Council of Women which Miss Phillips, a New York attorney, heads as president.

"We all require a certain amount of ego satisfaction," continued Miss Phillips. "Women turn to their clubs and they use up all their craving for politics in their organizations. They have little left when it comes to fighting for public office."

The conference programme embraces nearly every phase of modern thinking, modern government and modern living. The ideas of Fascists are to be heard with those of democracy and Communism.

Radio Certificates Awarded

Many Candidates From Western Canada Pass Proficiency Test. Certificates of proficiency in radio were awarded during June by the Department of Marine to the following candidates from western Canada:

Commercial, British Columbia—N. J. H. Darcy, Victoria, and S. A. Woods, Vancouver.
Ontario—K. H. Fluke, Port Arthur and W. L. Harris, Port William.
Alberta—G. A. Armstrong, J. C. Clements, J. McCrear and F. Reesor, of Vegreville; F. H. Barnstable and F. G. Wright, Hardisty; P. A. Price, Calgary; H. V. Gilpin, Viking, and J. U. Erickson, Killam.
British Columbia—R. M. Balfe, J. H. Brown, L. F. Gray and J. D. Patterson, of Vancouver, and D. D. Campbell, Victoria.
Manitoba—J. Kuhny and W. Byskul, Winnipeg; J. V. Cummings, Norwood, and H. Grandmont, St. Boniface.

Saskatchewan—E. A. Anderson, Moose Jaw; J. H. Brown and C. G. B. Noyes, Lloydminster; R. Hook and V. E. Person, Fairly Glen; A. Kepner, Kerrobert; G. L. McDonald, North Battleford; J. R. Vassell and J. Robert, Leask; J. H. McLeod, Leduc; H. R. Robinson, Shaunavon; A. C. Royle, Shellbrook; Z. A. Upson, Kiakie, and J. W. Wittmann, Weyburn.

Not An Easy Task

Newspaper Has To Cater To Many Shades Of Thought

A newspaper has a difficult task in catering to the views of many different shades of thought. Its endeavor always is to keep on an even keel and to give the greatest volume of space on those subjects in which it has found by experience the largest proportion of its public is interested. In following this course it often gives offence; not willingly, but simply because judgment affecting matters of interest continues to vary according to the likes and dislikes of the individual. The correspondent columns of any newspaper are a reflection of public opinion. They can, however, if not properly governed, become a happy hunting ground for cranks and for the perpetration of personalities and intolerance in viewpoint. That is often the reason why controversies are not allowed to become prolonged. Contrary to a general view entertained by the public one of the main problems in connection with a newspaper is what to leave out, not what to print. —Victoria, B.C., Colonist.

Just More Conspicuous

No More Women Wage Earners Than In Former Years

Denying that more women were wage earners today than a score of years ago, the Philadelphia Advisory Council of the State Employment Service explains "It merely seems that more women are working because they are employed in places where they are more conspicuous." The proportion of females gainfully employed in 1910 was 28.2, the council has found. In 1930 it was only 26.4 per cent. Thirty years ago the percentage was 26.

Chinese Merchant Prince

In London For Conference, Says China Always Conquers Her Conquerors

The following article by Mr. H. Hinton appeared in the Toronto Star. Wearing a dark blue velvet for trousers, and dark blue velvet for a tunic, and with slippers of curious design, the man who is known by name as Sir Robert Ho-Tung, and by repute as Haroun Al-Raschid, the richest man in the world, has come to London as the chief adviser to the Chinese delegation at the World Economic Conference. "The welfare of the world," he said, waving away a beautiful Chinese girl secretary with a face like the bloom of magnolia, "the welfare of the world depends on restoring the buying power of the east."

Sir Robert Ho-Tung is 70 years old, six feet tall and opinionated, and he lives on nothing but sour milk. They say he is worth more than \$100,000,000.

When Robert was a small boy, his parents managed to save five dollars, and that was enough to send young Ho-Tung, who showed even at that early stage signs of the merchant prince that was to be, to school. At school the boy towered over all the other little celestials. He passed a strict customs examination in Hong Kong, and in practically no time after that he was richer than Croesus.

"The value of silver had fallen so low," he said, "that it required more than \$16 worth of silver to buy a pound sterling. That means our buying power is cut to one-third of what it used to be, for silver is the chief currency in the east."

"I suppose then that China would like to see the remonetization of silver?" "Exactly," he said. "Potentially, China is the largest market in the world for British and Canadian and American goods. But what can she do when she cannot buy? What we could buy with one pound of rice some years ago now costs us three pounds of rice."

"It's just one of those little tragedies, I suppose. I turned to the question of Japan. 'Some time ago,' Sir Robert," I said, "you made the remark that China and Japan had been good neighbors, the past, and they would be good neighbors again. Do you still think so?" "That was before the Japanese eagles swooped down on the gates of Peking," said Sir Robert Ho-Tung. "And I still say China and Japan will one day be good neighbors again. Do you remember Manchuria? The Manchus were Manchurian monarchs who conquered China. They ruled China for 300 years. And did China become Manchurian? No. Manchuria became Chinese."

Which was just another way of saying that Dr. Wedgwood Ho-Tung said the other day. China always conquers her conquerors. And this great distinguished Chinese said: "As the quality of gold, when it is fine, and the quality of jade, when it is integral, so is the quality of the Chinese, when they reverse their birthright."

German Paper Suspended

Printed Article Alleging That General Italo Balbo Was a Jew

The newspaper Deutsche Zeitung was suspended recently for three months for alleging that General Italo Balbo, Italian Air Minister, is a baptized Jew.

Hermann Goering, Nazi minister without portfolio, personally ordered the suspension and immediate imprisonment of the responsible editor in a concentration camp. "This slanderous allegation originated in Vienna, and was intended to undermine German-Italian friendship," an official announcement said. "Newspapers printing anything likely to disturb Germany's foreign relations will be ruthlessly dealt with," the announcement added.

A Democratic Queen

There is no more democratic sovereign than Wilhelmina, Queen of Holland. With her daughter, Princess Juliana, the last of the House of Orange, she may be seen cycling on an ordinary "push-bike" along the sands near The Hague, accompanied by royal attendants, all on bicycles, a rather long procession, with the queen at the head of the queue.

HELP FOR TIRED WIVES

Take Lydia E. Pinkham's Vegetable Compound

Wives get tired during these hard times. The most common cause is the burden of the family. When the husband comes home with less money in his pocket . . . it is the wife who must struggle along and make the best of things.

"We are tired . . . worn out . . . nervous," try Lydia E. Pinkham's Vegetable Compound. It will give you the strength to carry out every 100 women who report that they feel better after using this medicine. Buy a bottle from your druggist today . . . and watch the results.

Treasures Concealed In Highwayman's Coat

Money and Rings Belonging To Dick Turpin Just Found

Plum-colored coat which belonged to Dick Turpin, the notorious highwayman, contained money and jewelry which have just been discovered. The articles, six silver coins and two copper coins, minted between 1711 and 1732, a gold ring, two silver rings, and a pair of silver-gilt earrings, were found by Mr. E. Rutter, of Cambridge, who recently bought the coat, mask, pistols, and spurs, which Dick Turpin left at the Three Tunns Inn, Cambridge, on January 12, 1739, when he escaped from the Newgate runners. He was hanged before he could reclaim them. The treasures were revealed by a half-crown dropping from the lining.

THE RHYMING OPTIMIST

By Alice Michalson

PEACE

No gift is lovelier than peace,
Which, after shout and clamor ceases,
From all earth's tumult brings release!

He who has known youth's leaping fires,
That driving force of wild desires,
That strength which struggle never tires.

He who has climbed ambition's heights
Through anxious days and sleepless nights,
Urged on in search of fame's delight.

He knows, when all the quest is past,
The trials cease, the troubles vast,
His prize is barren gain, at last.

And so to peace in time he turns,
His prideless, quiet day he learns,
For peace his weary spirit yearns.

No high-walled tower, no golden fleece,
He hears, through wisdom's slow increase,
Could ever be more dear than peace!

When Peanuts Are Poison

When Swallowed Whole More Dangerous Than Anything Else

The worst thing a person can swallow is a peanut, according to Dr. Chevalier Jackson, Philadelphia, who had authority on the removal of foreign bodies from the air and food tracts of the human body.

Speaking before members of the Louisiana State Medical School, Dr. Jackson, who is credited with saving the lives of some 3,000 persons who have swallowed foreign substances, said a peanut lodged in the throat or lungs was worse than a nickel or safety pin.

"The peanut seed creates a poison that will kill faster than the poison from any other seed," Dr. Jackson said. "On the other hand, other bodies that have been lodged in the patient for a week sometimes ten days, have been removed without ill effect."

Finds Canadians Friendly

Outstanding Characteristic Of People Opinion Of Lord Beesborough

More than two years' experience as Canada's Governor-General has convinced the Earl of Beesborough that the outstanding trait of Canadians as a race is their friendliness.

Lord Beesborough stated this conviction before a meeting of the United Service Institute of Nova Scotia, gathered to welcome him as he and Lady Beesborough visited Halifax along the route of their Nova Scotia tour.

"If you should ask me after two and a quarter years as Governor-General of Canada, what is the outstanding characteristic of the Canadian, I should say friendliness. Whether it be the Prime Minister or some obscure individual—they all have the same friendliness."

The Way Of The Sea

John Maseloff, the poet laureate speaking at Rhodes House, Oxford, expressed his belief the life of the sea was one of the best schools for story writers. "It was my fortune to be bred to the sea as a boy and the way of the sea is the way of narrative. The sailors among whom I passed my younger years were story tellers almost to a man," Mr. Maseloff said. "Many stories of the sea when he joined a sailing ship at the age of 13."

"When people start laughing at a threatened catastrophe, the worst is over before it has begun to happen," says Irvin S. Cobb.

Peasants from England have just been released in Zululand.

It is 150 years—1783—since the first balloon flight was made.

Little Helps For This Week

"These were the potters, and those that dwell among plants and birds; there they dwelt with the king for his work."—1 Chronicles 5:23.

A jowler task on them is laid,
With love to make the labor light;
And there their beauty they must show
On quiet homes, and lost to sight.
Changed are their visions, high and fair,
Yet calm and still, they labor there.

Anywhere and everywhere we may dwell
With the King for His work.
We may be in a very unlikely or unfavorable place for this, it may be a literal country life, or, little enough to be seen of the going of the King around us; it may be among hedges of all sorts, hindrances. In all of these, it may be furnished for our hands full of all manner of pottery for our daily task. No matter. The King who placed us there will come and dwell with us, the hedges are all right or He would have done away with them, and it does not follow that what seems to hinder our way may not be for its very protection. As for the pottery, that is exactly what He has seen fit to put into our hands, and therefore it is for the present His work.—F. R. Havergal.

Peer's Conversion

Lord Melchett Returns To The Faith Of His Fathers

Lord Melchett, who was born a Jew and baptised a Christian, has turned to the faith of his fathers. The ceremony took place recently in private in a small Stamford Hill Synagogue, Melchett afterwards joining in a Sabbath service.

Rev. Maurice Perizew, rabbi of the North London Liberal synagogue, who conducted the ceremony, is an old friend of Melchett. It is said the peer's conversion was partly thought to directly attributable to Nazi anti-Jewish activities and the outcome of deep study and deliberation.

Where Water Is Treasured

Miss Dorothy Buck, the novelist, who lives in Tunisia, has been living during her visit in Europe, about some of the quaint customs of her country. "The strangest dinner custom," she says, "is that if you are invited out you take your own pitcher of water. Wines are abundant, but the water is a most precious and treasured commodity."

Made Poor Choice

Garbade Meghrigal, a Syrian, found a dandy place to stow away on the "le de France" when she sailed from Havre. It was a ventilator. Three days at sea, however, and Meghrigal discovered why it was called a ventilator. It ventilated. He caught cold, sneezed, and was thrown into irons.

The World's Largest Bible

Louis Waynal, a Los Angeles carpenter has spent his leisure during the past five years in printing what he believes to be the largest Bible in the world. Each page was hand printed, and the finished Bible contains 8,048 pages, and weighs half a ton.

LOCAL AND GENERAL

Mr. and Mrs. Dante Filoflo and Mr. Joe Filoflo were visitors at the Lethbridge fair.

Mrs. Percy Clark of Pincher Creek was the guest of Mrs. V. Cyr, a cousin, for the past two weeks.

Roger Robertson of Wallace, Idaho, was a Coleman visitor last week.

Mrs. H. Appleton and family of Turner Valley are visitors at Mr. and Mrs. H. C. McBurney's.

A number of girls from town are camping at Lee Lake for a couple of weeks.

Mr. and Mrs. Clarence Huffman have moved back to their former shop next to Grand Union hotel.

Wyndham Jones, who two months ago left to visit his father in Wales, is expected to return this week.

Mr. Hampson, manager of the Canadian Legion club at Bellevue was in town on Monday afternoon.

Mrs. J. Derbyshire and son Jack left by car on Saturday for Crawford Bay, B.C., where they will spend two weeks vacation.

Michael Hennessey was in town last week from his retreat near the lake, and is spending a pleasant summer catching the odd fish.

Mr. and Mrs. Arthur Jones and Ronnie and Alf returned on Sunday from a pleasant week's holiday in Lethbridge, where they attended the stampede.

Mr. and Mrs. F. King of Weyburn, called at The Journal office to renew acquaintance with the editor while on their way to the coast.

Ken. Blain, representing Crown Nest Pass Motors, won two prizes from General Motors Limited for points in a salesmanship competition.

Attend the opening of Webster's "Value Store" on Saturday, where you'll find many useful articles on sale at from 5c to \$1.00. See their advt in this issue.

Ledieu's store exterior is being re-painted by George Graham, with Everett Price as his assistant. They guarantee not to drop any globes of paint on the sidewalk.

Steve Janak returned to Coleman after living for 14 months at Outlook, Sask. He would like to find work on a contract cutting and hauling props.

Coleman Boy Scouts who were camping at Waterton Lakes returned on Sunday, in charge of Reggie Jones, Scout master. 13 attended, and spent a very enjoyable holiday there.

Merchants—see that your printing bears the imprint of the Coleman Journal, and thereby help to set the example of buying at home. Good quality work at reasonable prices from local workmen, who buy from local stores.

The only reply to those who for political purposes criticize the government relief camps for single unemployed is to suggest or provide something better. Were they to acquaint themselves with conditions as to clothing, food, medical provision for sickness and other things provided for men's comfort, they would find that it is far better for men than to have to beg their way across the country relying on charity and handouts. Moreover, the great majority of the men in camps respond to square treatment and are not making the fuss that political opponents of the government are doing. The people of Canada bear the cost of these relief camps, and the government is meeting a difficult situation in a commendable manner.

After being in the ladies wear business here for many years, Mrs. H. E. Gate closed her store on Monday after holding a close out sale. Mr. and Mrs. Webster have rented the store and taken over the balance of the stock. Mrs. Gate will continue her insurance business.

Girls returning from McBain's lake on Sunday after two weeks holiday included Brownie Devine, Vivian McLeod, Julia Ondrus, Penelope McDonald, Rose Claes, Dilya Brown, Ellawyne Narraway, Nora McLeod and Wilma Halliwell. Sub-tanned complexions indicated they had been having a warm time. They all agreed that McBain's was a good place to go camping.

Angelo Gentile, baseball king of Coleman, gathered together the local star players to play Coalsdale for the much coveted White Lunch cup at Lethbridge. Local players included Joe Kapalka, Cecil Milley, Tony Vejpreva, Selenki, Ziet, W. Gate, John Kuhasek and Buck Falser. The double header resulted in Coalsdale winning both games by 8-5 and 9-4. Keen interest was shown and the crowd certainly got their money's worth.

The world's great need is courage. Show yours by advertising.

ANNOUNCEMENT

Mr. Melville Anderson, of Anderson & McLean, sight specialists, Calgary announces his next visit. To G. R. Howell's, Coleman, on

Tuesday, August 1st

30 years' experience and regular visits assure you of satisfaction in all optical work.

Announcement of Change of Business re COLEMAN CAFE

From July 1, 1939, the Coleman Cafe has been taken over by Ben Chow and Leung Ying, they having purchased the interests in this business from Long Kam.

Just Think of It!

In the course of one year, the balance of your watch makes 157,680,000 revolutions. In time the oil gums, produce friction and wears the delicate bearings, destroying their high finish and perfect fit, thus ruining an accurate timepiece.

An ordinary machine is oiled daily—your watch should be oiled once a year.

Let us examine it. An honest opinion from us will cost you nothing. S. W. CHAHLEY - Central Ave.

Tradesmen can set a good example in home buying by seeing that their printing is done in The Journal office. The imprint of The Coleman Journal proclaims to the people that a merchant practices what he likes the people to do with him—that is, trade at home. Orders filled to your entire satisfaction on anything from a visiting card to a sheet poster in colors.

Several parties from town went to the north and south forks on Sunday and fair catches were reported. Jack Williamson recently fished all afternoon, and just as dusk was setting o'er the mountains, he felt a terrific jerk on the line, and commenced to haul in and back up on the rocks. But fate intervened and sent him sprawling, causing him to lose the fish. It was a big one, too! Just what he said—well, you can imagine.

Mrs. D. A. McKinnon, well known to many of the older residents of Coleman, renewed acquaintance with friends in Coleman and Blairmore over the week-end. For fifteen years Mr. and Mrs. McKinnon and family lived here, and for several years have lived in Kimberley B.C. Their eldest daughter is training in the Royal Victoria hospital, Montreal, and their second daughter will take up training there in January. Though it is eight years since they left Coleman, Mrs.

McKinnon remarked they still have a warm spot in their hearts for Coleman, and keep informed of local doings through The Journal, to which they have been subscribers since it started publication.
